

# Dry Clean

## Disinfectant for food industry

### Description

**Dry Clean** is ready-to-use spray disinfectant for use in the food, beverage and dairy industries.

### Key properties

- **Dry Clean** is an alcohol-based disinfectant also containing low levels of organic sequestrant and quaternary ammonium compound (QAC). It is specially formulated for direct application to surfaces when it is impossible or undesirable to use large amounts of water-based products. It is effective against most vegetative forms of microorganisms including Gram-positive and Gram-negative bacteria and yeast's;
- **Dry Clean** is safe for use on food contact surfaces and evaporates rapidly, leaving virtually no residue. It is recommended for use in high-risk areas to clean and disinfect conveyors, fillers and other equipment after small product spillages etc. It can also be applied during mid-shift breaks to maintain a good standard of hygiene until production is restarted again.

### Use instructions

**Dry Clean** is used undiluted, apply by spraying onto surfaces and leave to dry. For disinfection, leaving the product in contact with the surface for 10 minutes. Avoid spraying near to motors or other unprotected electrical equipment. **Dry Clean** is safe when applied as recommended for use on materials commonly found in the food industry. However, avoid spraying onto polycarbonate and other plastics that are susceptible to stress cracking. In the event of uncertainty, it is advisable to evaluate individual materials before any prolonged use. The definition of the ideal process conditions (concentration, temperature, contact time) depends on the application. Consult the technical specialist from **Diversey**.

### Technical data table

Appearance	Clear, colourless liquid
Relative density at 25°C	0.96
pH	7.1

*The above data is typical of normal production and should not be taken as a specification.*

### First Aid Measure

For recommendations about first aid measures, storage and environmental consult the Material Safety Data Sheet / MSDS.

### Chemical Composition

Deidecyl dimethyl ammonium chloride, sequestrant, isopropyl alcohol and water.

### Active Ingredient

Deidecyl dimethyl ammonium chloride – 0.015% and Isopropyl alcohol – 25%.

### Shelf Life

24 months
